1 Practice 13.3. Voluntary

This practice is the last in the series of practices consisting of a Contacts application. This practice is based on the previous one (13.1 or 13.2). Before starting it, finish the previous one, make the corrections you consider, if needed, and start coding.

The mark of this practice **can increase the mark of the second evaluation by 0.5 points**, provided that the marks of the practice part and the exam are at least 5. The note that increases each exercise is indicated on it. You must do exercise 1, and then you can do the exercises of your choice.

You need to make a **short** (no more than 5 minutes) video showing how it works and explaining your job.

1.1 Exercise 1

(+0,4 points)

Deploy your app in a **real public server** and can be done by the way you want, including Docker or PaaS services. Pass the app'sURL to the teacher.

1.2 Exercise 2

(+0,1 points)

Add to the server HTTPS support and redirect all the requests to the HTTPS service instead of the HTTP.
